ARRANGEMENT FOR THE RECORDS:

20 Jun 1962

SUBJECT: Excav Pilot Evaluation, Group B

On 17 Jun 62, the undersigned met with Lt. Col. Rufus Hessberg, Chief, Biomedical Sciences Division, AMG, to discuss arrangements for sending additional pilots through the School of Aerospace Medicine for medical, psychological, and psychiatric evaluations. Results are summarized below.

1. Col. Hessberg is willing to assume administrative responsibility for sending these people through SAM. Further, he is willing to relinquish the records to General Flickinger upon receipt of same.

2. It was explained to Col. Hessberg that this office wishes these examinations to be completed by mid or late August. Col. Hessberg anticipates no difficulties in accomplishing these evaluations within the time limits set forth. However, the usual time lapse between examination and receipt of reports is six weeks. Col. Hessberg will make every effort to shorten this time.

3. The undersigned was asked to submit the names, service number, and present duty station of the nominees to Col. Hessberg.

4. The undersigned was further asked to establish a funding citation for these evaluations.

5. Col. Hessberg will request all the raw psychological data to be forwarded along with the usual SAM reports, so that [redacted] may have access to these through General Flickinger.

25X1

6. Col. Hessberg will discuss with Dr. Lamb, Chief, Consultation Services, SAM, the fact of some of the candidates having gone through SAM previously. Decisions will be made as to the extent of the re-evaluation required, if any, to allow SAM to qualify these candidates at the present time for special missions.
